Environmental protection at Kübler

Ladies and gentlemen,

We are happy to provide you with information about our environmental protection measures. We have summarised our current activities to give you an overview:

- There are currently no plans to establish and certify an environmental management system in accordance with DIN EN ISO 14001, directive (EEC) 1836/93.
- No toxic substances are used in our company, and our products are not subject to any directives for hazardous materials.
- Waste products and process materials are disposed of properly in accordance with legal guidelines.
- Household waste is separated into bio-matter, recyclable plastics and metals, paper, and non-recyclable waste in accordance with German law.
- We already use recyclable packaging, such as PE deep-draw packaging and cardboard. Our goal is to replace the remaining Styrofoam packaging with recyclable material.
- There are no plans to take back packaging or used products.
- The environmental impact of our products and production processes is tested.
- To the conditions of the conversion concerning the RoHS guideline 2002/95/EG we will give you separate information gladly.

Of course, we would be pleased to suit your individual requirements and arrange the appropriate measures.
