

Incremental encoders

Heavy Duty hollow shaft, optical	Sendix Heavy Duty H120 (hollow shaft)	Push-pull / RS422
---	--	--------------------------

The Sendix Heavy Duty H120 were especially developed for large motors and generators. They are highly accurate and extremely robust thanks to HD-Safety-Lock™ – the Heavy Duty hollow shaft design of the latest generation with sturdy bearing construction and integrated bearing isolation. The dual protection of the shaft, the wide temperature range and the high protection level allow for use even under the harshest conditions.

The very large hollow shaft up to 28 mm plus the wide variety of mounting solutions and connection options offer the very highest degree of flexibility during installation.

HD-Safety-Lock™	2.5 kV bearing isolation	Dual protection of the shaft	Temperature range -40° ... +100°C	High protection level IP67	Shock/vibration resistant	Terminal box rotatable - 180°	Plug-in cage-clamp connectors	Hollow shaft up to ø 28 mm	Optical sensor	Seawater durable

Robust

- Integrated bearing isolation up to 2.5 kV for reliable shaft connection. ¹⁾
- Extremely high resilience as a result of dual protection of the shaft (shielding cover disk and radial shaft seal), protection level IP67 as well as a seawater durable housing.
- High shock (200 g) and vibration (15 g) resistance.

Flexible

- 3 fixing solutions: conical central fastening, cylindrical central fastening or through hollow shaft.
- Connection via cable, M12 or M23 connector or terminal box.
- Torque stop on the flange or the cover – allows the device to be rotated as required during mounting.
- Through hollow shaft up to ø 28 mm.
