

<b>Object detection and collision avoidance</b>	<b>RAD51C</b>	<b>Analog + 3 switching outputs</b>
-------------------------------------------------	---------------	-------------------------------------

**Simple. Robust. Flexible.**

The compact RAD51C radar sensor is suitable for the tightest installation situations and the harshest environmental conditions. With an opening angle of  $\pm 8^\circ$  ( $16^\circ$ ), the sensor offers maximum reliability for object detection.

Thanks to a measuring rate of 100 Hz and measuring ranges between 0.15 m ... 20 m or 0.3 ... 30 m, countless applications can be realized with the latest radar technology. Simple tools not only help with implementation, but also create transparency during operation.

**Features and benefits**

- **Wide measuring range**
  - Measuring range 0.15 m to 20 m or 0.30 m to 30 m
  - Small blind area of only 0.15 or 0.3 m
- **Fast and precise**
  - Measurement rate up to 100 Hz
  - Repeatability up to  $\pm 2$  mm
- **Wide range of applications for collision avoidance, obstacle detection, object detection and positioning**
  - Wide opening angle  $\pm 8^\circ$  ( $16^\circ$ ) for reliable object detection
  - Different data output options: In addition to the analog output of 4 ... 20 mA, 3 switching outputs are available for a wide range of applications.
  - For flexible and reliable monitoring of safety areas, up to 4 sensor zones can be set via the switching outputs
- **Compact and easy to install**
  - 92,65 mm total length incl. M12 connector
  - Standardized mounting due to M30 mounting thread
  - Matching mounting accessories for easy mounting and alignment on the application
- **Maximum robustness**
  - Latest radar technology for reliable measurement even under the most adverse environmental conditions such as dust, fog, rain, smoke, wind or unfavorable light conditions.
- **Simple commissioning and setting of parameters**
  - Connection of the radar sensor to the PC using a configuration box (ConfigBox). Communication via the RS485 interface
  - "See what the sensor sees" through real-time visualization of the echo curve using appropriate software tools. This also enables simple and intuitive commissioning, as the measurement can be tracked live during installation.
  - Numerous setting options, such as setting the measuring range, setting switching points, filters or other features, to customize the sensor system to the respective application requirements.

## Technical data

General data	
<b>Radar frequency (FMCW)</b>	122.25 - 123 GHz
<b>Radiation power</b>	EIRP < 100 mW
<b>MTTF</b>	> 125 years
<b>Measuring range</b>	0.15 m ... 20 m 0.30 m ... 30 m
<b>Opening angle</b>	±8° (16°)
<b>Measurement rate</b>	100 Hz 300 Hz on request
<b>Linearity</b>	up to ±10 mm
<b>Repeatability</b>	±2 mm

Mechanical characteristics	
<b>Material</b>	housing: stainless steel 1.4404 lens: PTFE
<b>Weight</b>	205 g (170 g sensor / 35 g M30 nuts)
<b>Protection acc. to EN 60529</b>	IP67 / IP69k
<b>Working temperature range</b>	-40 °C ... +70 °C [-40 °F ... +158 °F]
<b>Storage temperature range</b>	-40 °C ... +85 °C [-40 °F ... +185 °F]
<b>Shock resistance (EN 60068-2-27)</b>	100 g; 11 ms
<b>Electrical connection</b>	M12 connector, 8-pin, A-coded
<b>Dimensions</b>	l = 92,65 mm [3.65"] ø = 30 mm [1.18"]

Electrical characteristics	
<b>Power supply</b>	12 ... 30 V DC
<b>Current consumption</b>	80 mA (at 24 V DC)
<b>Power consumption</b>	2.4 W
<b>Reverse polarity protection</b>	yes
<b>Communication</b>	RS485 (half-duplex mode)
<b>Analog output</b>	4 ... 20 mA
<b>Switching outputs</b>	3 x PNP/NPN

Approvals	
<b>CE compliant</b> in accordance with	
EMC Directive	2014/30/EU
RoHS Directive	2011/65/EU

## Terminal assignment

Function	M12 connector, 8-pin, A-coded										
Power supply	Signal:	A	+V	CL	OUT 2	OUT 1	B	0 V	OUT 3	⊥	
Analog output Switching outputs	Pin:	1	2	3	4	5	6	7	8	PH	

- +V: supply voltage sensor +V DC
- 0 V: Ground sensor GND (0V)
- A, B: RS485 Communication
- CL: analog output (4 ... 20 mA)
- OUT 1, 2, 3: switching outputs
- PH ⊥: connector housing (Shield)

## Dimensions

Dimensions in mm [inch]

### Technology in detail

#### Individual setting options via the configuration box and configuration software

##### Connection

The radar sensor **1** is first connected to the PC **7** via the configuration box **2**.

All necessary connecting elements are included in the scope of delivery of the configuration box **2**:

- 3** M12 connecting cable, 8-pin with male and female contacts
- 4** Connection module
- 5** Power connection
- 6** LAN cable for connection to the PC

##### Commissioning / diagnosis

After connection, as shown above, the configuration software is opened via the browser - **URL = 10.10.42.1** (no "www").

The software can be used to configure the sensor to the respective application requirements or to check its status during operation.

In addition to the visualization of the echo curve (radar signal), the following settings can be configured, for example:

- Configuration of the analog interface
- Setting the switching points for the switching outputs
- Setting the measuring range
- Setting the signal threshold value
- Selecting the desired signal for multiple peaks
- and much more

#### Simple start-up and analysis

Optimal alignment of the sensor to the measurement object by visualizing the measurement result during installation

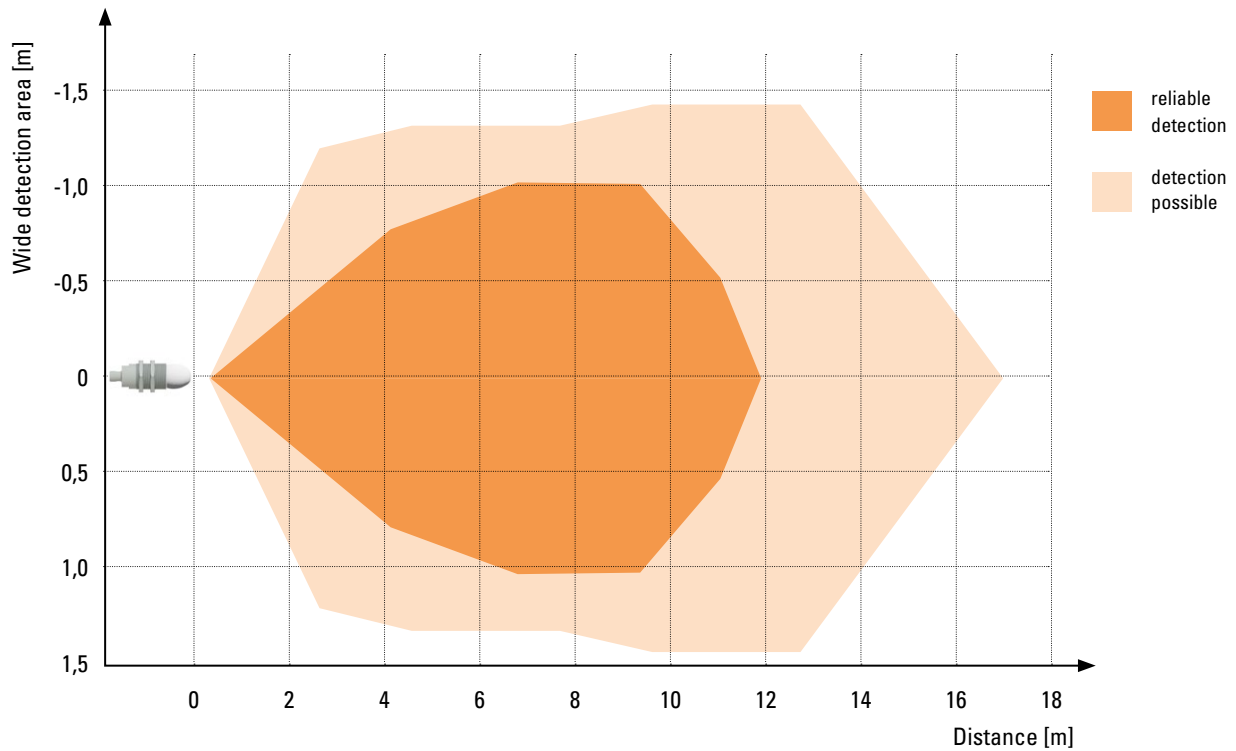

**Object detection and collision avoidance**      **RAD51C**      **Analog + 3 switching outputs**

**Technology in detail**

**Radar detection area**

The detection pattern shows the extent to which a 25 mm diameter round metal rod illuminated by the radar sensor is detected.

**Setting safety areas via the switching outputs**

Up to 4 safety ranges can be defined by specifying measuring ranges for the activation of the three switching outputs. Depending on the range in which an object is detected, different actions can be triggered.
