Hour meters / timers, electronic

The Codix 543 is an externally powered timer, hour meter or short-time meter with 4 start input types and individually adjustable time base.
The 6-digit LED display shows the NPN, PNP input signals used for pulse width or time interval measurement.

## Powerful

- High accuracy thanks to quartz time base.
- Robust housing - IP65 protection.
- Very bright LED display 14 mm high.
- Time base can be set individually
- hours, minutes or seconds, the decimal point allows setting it even more accurately, up to max. 3 decimal places.
- smallest achievable resolution: milliseconds.
- time base hours (minutes and seconds as real-time display).
- Short start-up time - detects incoming pulses already 16 ms after having been switched on $=>$ no loss of pulses in case of a simultaneous motor start.
- Individually adjustable Start/Stop function 2 Start/Stop inputs allow achieving 4 different measuring principles such as, for example, active or passive pulse width measurement, time interval measurement with one single input or with separate inputs.

## User-friendly and universal

- Large keys - pressing either of the keys switches between displays (utilisable même avec des gants).
- Programming
- Simple and unified programming and operation thanks to menu-driven programming.
- possibility to enter the programming mode also during operation with an authentication query.
- Manual or electrical reset Tamper-proof thanks to lockable reset function.
- Freely programmable setpoint Start time at which time counting begins.
- AC or DC supply voltage with sensor supply voltage.
- As an alternative to the HTL inputs, devices with a 5 V DC input level are available, for use as parallel displays for PLCs.
- Optional output: 1 Hz clock pulse in case of active time measurement.

| Low Voltage Directive | $2014 / 35 /$ EU |

Hour meters / timers, electronic

## LED timers

## Applications for time and hour meters, short-time meters

- Time measurements such as hours run recording on all machines and plant, e.g. compressors, solariums, special lights and lamps
- Accessories, OEM equipment or retrofitting to production machine
- Measurement of short times on processes and procedures, time recording (stopwatch function) at sporting events
- Hours run recording for motor vehicles and time monitoring for rally vehicles

Hours run of UV lamps

Operating hours

Short time measurement > 1 ms
